PROFILE

I started out as a frontend developer who cared a little too much about pixels — and that same care now goes into building automation systems that quietly give international teams back hundreds of hours a month. These days I lead automation sales, look after client relationships across time zones, and design workflows that keep running long after everyone has logged off: n8n pipelines, Zapier scenarios, Odoo CRM/ERP integrations and AI-assisted systems. You get one point of contact from the first call to handover — and if automation isn't the right fix for your problem, you'll hear that from me before you ever pay me.

SELECTED PROJECTS

2024 · 85%

International Sales Pipeline Automation — Overseas SaaS Agency

Manual lead routing was quietly losing 40% of qualified leads. Set up an n8n webhook listener - lead scoring - Odoo CRM auto-assignment - Slack alerts - automated follow-ups. Lead response time dropped by 85%.

2024 · 92%

E-Commerce Order Processing Pipeline — Mid-size E-commerce Business

Order processing was eating 4-6 hours a day by hand. Connected Shopify webhook - n8n orchestration - Odoo ERP inventory updates - automated invoicing - shipping labels - customer notifications. Fulfillment ran 92% faster.

2024 · 95%

Multi-Shift Team Coordination System — 24/7 Operations Company

Three shifts in different time zones had no shared handoff system. Built a Laravel dashboard - real-time Trello sync - n8n handoff reports - MySQL tracking - escalation alerts. Task duplication fell by 95%.
